Detachable Level Transmitters

Submersible level transmitters with a twist!

SAVES TIME - SAVES MONEY

Six models available...

DLT 590 ♦ DLT 591 ♦ DLT 592 ♦ DLT 593 ♦ DLT 594 ♦ DLT 595

- ♦ The DLT Series allows for a quick sensor swap without the removal of your entire installed cable run. No special tools are required. Simply pull up the cable and uncouple the sensor head to replace. Makes troubleshooting, repair or replacement simple.
- ♦ The Viatran DLT Model 593 (shown above) is a submersible transmitter specifically designed to meet the challenging demands of liquid level measurement. Rugged Ceramic Diaphragm allows use without a cage. If you prefer to use a cage, ask about our Sharkcage™ option for Models 593 and 595.
- ♦ Available in ranges from 0-16 inches W.C. to 0-835 feet W.C.
- ♦ Polyurethane (PUR) cable is the most popular, Polyvinyl Chloride (PVC) & Fluorinated Ethylene-Propylene (FEP) cables are also offered.
- ♦ Liquid Level & Depth, Water & Wastewater, Lift Stations, Reservoirs & Dams, Rivers, Holding Ponds, Wells, In-ground & Above ground Tanks, Inventory Tank Gauging
